

Baby Food Market is estimated to be US\$ 1116.72 billion by 2030 with a CAGR of 6.7% during the forecast period

[Baby Food Market](#) accounted for US\$ 61.36 billion in 2020 and is estimated to be US\$ 116.72 billion by 2030 and is anticipated to register a CAGR of 6.7%. Baby food is designed primarily for toddlers and infants aged 4 months to 3 years. Baby food is soft and easy to eat, as well as helping to meet the nutritional needs of toddlers and newborns. Baby food comes in a variety of forms, including powder, solid, and liquid. Cereals are one type of solid baby food. Powdered baby food, on the other hand, is inexpensive and may be fed to an infant by mixing it with water. It's also available in a variety of flavours, shapes, and flavours. These infant food items are readily available and can be obtained directly from manufacturers.

The report " Global Baby Food Market, By Product Type (Ready to Feed Baby Food, Dried Baby Food, Infant Cereals, Infant Milk Formula, and Others), By Form (Powder, Liquid, and Solid), by Source Type (Inorganic and Organic), By Distribution Channel (Supermarkets, Specialty Stores, Drugstores, Hypermarkets, Online Channel, and Others), and By Region (North America, Europe, Asia Pacific, Latin America, Middle East, and Africa) - Trends, Analysis and Forecast till 2029"

Key Highlights:

- In May 2021, Food processing company Heinz has been producing baby food for decades. Now, it's set to launch a plant-based range after market research showed parents weren't satisfied with the options available. The range, called Heinz for Baby Pulses, consists of three options — Saucy Pasta Stars with Beans & Carrot, Potato Bake with Green Beans & Sweet Garden Peas, and Risotto with Chickpeas & Pumpkin. All three options are free of added sugar and salt. They also count towards the recommended five daily servings of fruit and vegetables.
- In January 2021, Timios, a Bangalore based packaged healthy snack brand for children, enters into the baby food market with the launch of its new category of 'Made to Order' Porridge range for infants and toddlers. This new product is designed keeping in mind the nutritional requirements of babies between ages of 6 to 18 months, and is available in 12 variants.

Analyst View:

The worldwide baby food market is primarily driven by factors such as the increasing number of working women around the world, which has resulted in increased parental concern for their infants. As a result, quick infant food has aided working moms in time management.

Furthermore, nonlactation concerns in mothers have led to a reliance on professionally manufactured baby food products, which help infants meet their nutritional demands. Furthermore, as people's lifestyles change and their disposable money rises, demand for baby food products rises. Urbanization and population growth will present a lucrative opportunity for global market players.
