

## **Global Welded Metal Bellows Market is estimated to be US\$ 404.87 million by 2030 with a CAGR of 5.30% during the forecast period**

Global Welded Metal Bellows Market accounted for US\$ 242.5 million in 2020 and is estimated to be US\$ 404.87 million by 2030 and is anticipated to register a CAGR of 5.30%. Metal bellows are flexible parts or flexible seals that are employed in a variety of industrial applications, such as pipe junctions, where compression is expected when pressure is applied from the opposite side of an elastic vessel. Metal bellows are designed to compress or expand when pressure is applied, then return to their original shape when the pressure is released. Metal bellows operate as a barrier in circumstances where pipes expand due to temperature changes by restricting the compression by force. Aerospace, water treatment, manufacturing, mining, power generation, automotive, and wind energy are just a few of the industries that use metal bellows.

The report " Global Welded Metal Bellows Market, By Type (Stainless Steel Bellows, High Nickel Alloys, and Others), By Application (High Vacuum Seals, Leak-Free Motion Feedthroughs, Flexible Joints, Volume Compensators, and Pressure & Temperature Actuators), and By Region (North America, Europe, Asia Pacific, Latin America, and Middle East & Africa) - Trends, Analysis and Forecast till 2029"

### **Key Highlights:**

- MW Industries, Inc. said in July 2019 that it is developing unique energy solutions to meet the rising energy demand from a variety of industries, including petrochemicals and oil and gas. The energy solutions, according to the company, include electrodeposited bellows, energised seals, and hefty fasteners that may be used in harsh environments.

### **Analyst View:**

Metal bellows are widely used in a variety of end-use sectors, including automotive, semiconductor, aerospace, oil & gas, and pharmaceuticals, which are driving the market. Government restrictions are strict in the worldwide metal bellows market; nevertheless, end-user preference for metal bellows over other options is projected to enhance the market in various areas. Metal bellows are in high demand in the aerospace and defense industries. The worldwide metal bellows market is predicted to be primarily driven by this.

### **Key Market Insights from the report:**

Global Welded Metal Bellows Market accounted for US\$ 242.5 million in 2020 and is estimated to be US\$ 404.87 million by 2030 and is anticipated to register a CAGR of 5.30%. The global welded metal bellows market report segments the market on the basis of type, application, and region.

- Based on Type, Global Welded Metal Bellows Market is segmented into Stainless Steel Bellows, High Nickel Alloys, and Others.
- Based on Application, Global Welded Metal Bellows Market is segmented into High Vacuum Seals, Leak-Free Motion Feedthroughs, Flexible Joints, Volume Compensators, and Pressure & Temperature Actuators.
- By Region, the Global Welded Metal Bellows Market is segmented into North America, Europe, Asia Pacific, Latin America, and Middle East & Africa.

### **Competitive Landscape & their strategies of Global Welded Metal Bellows Market:**

The key players operating in the welded metal bellows market are KSM, Inc., BOA Group S.A., Technetics, Inc., Aesseal PLC, Senior Aerospace Metal Bellows Manufacturing, Metalflex Manufacturing Co., Inc., Duraflex, Inc., Mirapro Co., Ltd., Flex-A-Seal, Inc. and Hyspan Precision Products, Inc.

The market provides detailed information regarding the industrial base, productivity, strengths, manufacturers, and recent trends which will help companies enlarge the businesses and promote financial growth. Furthermore, the report exhibits dynamic factors including segments, sub-segments, regional marketplaces, competition, dominant key players, and market forecasts. In addition, the market includes recent collaborations, mergers, acquisitions, and partnerships along with regulatory frameworks across different regions impacting the market trajectory. Recent technological advances and innovations influencing the global market are included in the report.
