

## **Ride Sharing Market is estimated to be US\$ 364.57 billion by 2030 with a CAGR of 16.20% during the forecast period**

[Ride Sharing Market](#) accounted for US\$ 82.32 billion in 2020 and is estimated to be US\$ 364.57 billion by 2030 and is anticipated to register a CAGR of 16.20%. Prior to the pandemic, ride-sharing services were the most popular because they provided a convenient and cost-effective way of personal mobility through the use of a transportation network infrastructure. Another benefit was that they helped to lower travel costs and eliminated the need for people to possess a car. Another advantage was the potential reduction in traffic congestion, which might have been accomplished without COVID-19 by 2022–2023. Mobility service providers (MSPs) developed several kinds of ride sharing services, such as e-hailing, private vs. corporate car sharing, carpool, car rental, and so on, as time and demand dictated. Users could select from a wide range of alternatives based on their requirements, journey distance, and personal comfort. The report " Global Ride Sharing Market, By Commute Type (Long Distance, Corporate, and Short Distance), By Business Model (P2P, B2C, and B2B) and, By Region (North America, Europe, Asia Pacific, Latin America, and Middle East & Africa) - Trends, Analysis, and Forecast till 2029"

### **Key Highlights:**

- The GrabPet XL and GrabCar Exec services will be available in May 2021, providing more options for Grab clients with varying mobility needs while also increasing earning potential for eligible driver-partners.
- Uber Technologies, Inc. and Walgreens announced a new feature in April 2021 that would allow customers to schedule vaccination appointments at a Walgreens location while also scheduling an Uber transport to the vaccine appointment, all with a few taps on the Uber app. With all individuals in the United States eligible for the COVID-19 vaccine, Uber and Walgreens are committed to ensuring that transportation is never an impediment to immunisation.
- Gett raised USD 115 million in January 2021, led by new backer Pelham Capital Investments Ltd., with participation from unnamed previous investors. Gett has received USD 750 million in all, with investors including VW, Access, and its creator Len Blavatnik, Kreos, MCI, and others, and its last valuation was USD 1.5 billion, with a USD 200 million fundraise scheduled for May 2019.
- Lyft is set to debut in July 2020. The Lyft pass provided a way for businesses to cover the expenses of rides for their employees and vital workers, as well as customers, visitors, and patients, while focusing on safety, convenience, and flexibility.
- OLA began offering services in London in February 2020. With three categories: Comfort, Comfort XL, and Exec, the Ola platform would be fully operational.

**Analyst View:**

Finance, fuel, upkeep, registration/taxes, and maintenance & repair, as well as depreciation, all contribute to the cost of owning a car. The expense of owning a vehicle rises year after year. Depreciation accounts for 43% of the total ownership cost, according to the American Automobile Association (AAA), however the other costs, such as maintenance and gasoline, account for 25%. Fuel prices and maintenance expenses have risen dramatically in recent years, and the trend is expected to continue with no signs of abating. Automobile ownership has become more of a liability than an asset as cities become increasingly congested with people and cars.
