

Shoe Deodorizer Market is estimated to be US\$ 187.77 billion by 2030 with a CAGR of 5.3% during the forecast period

Global Shoe Deodorizer Market accounted for US\$ 112.47 billion in 2020 and is estimated to be US\$ 187.77 billion by 2030 and is anticipated to register a CAGR of 5.3%. Shoe deodorizers are compounds that are put to the inside of shoes to eliminate odour. Shoe deodorizers come in a variety of forms, such as powders, sprays, and insoles. The need for shoe deodorizers is being fueled by factors such as increased consumer aesthetics and hygiene awareness. Because of the popularity of sports shoes among sports and fitness aficionados, these trends have grown in popularity. Shoe deodorizers are in high demand due to an increase in the number of sports facilities and fitness centres throughout the world.

The report " Global Shoe Deodorizer Market, By Product Types (Sprays, Balls, Insoles, Powders and Ultraviolet Deodorizers), By End User (Non-athletes and Athletes) and By Region (North America, Europe, Asia Pacific, Latin America, and Middle East & Africa) - Trends, Analysis and Forecast till 2029"

Key Highlights:

- In January 2019, an ex-SpaceX engineer received a USD 150,000 investment to develop Zor pads, odor-eliminating shoe pads. These shoe inserts are composed of activated carbon fabric and are loaded with NASA-tested technology to absorb shoe odour for up to 60 years.

Analyst View:

The demand for appropriate sports footwear is increasing as the number of fitness and healthcare institutions grows. According to Forbes, the United States has 32,000 health and fitness centres in 2018. This has strengthened the sportswear industry, with sports shoes being the most popular type. The need for deodorizer products is predicted to be driven by the requirement to maintain good maintenance and hygiene of frequently worn footwear. Smelly feet are a common worry, especially among children and working professionals who spend lengthy hours outside the house.
